PELLE CURTESOFT ES

CHARACTERISTIC

Special Fatliquoring Agent

- Chemical Structure** : Mixture of phosphate ester and synthetic oil surfactant
- Apperance** : Yellowish, creamy paste
- Concentration (%)** : $55,0 \pm 1,0$
- pH (10 % in water)** : 6,0-7,0
- Ionic Structure** : Anionic

PROPERTIES AND APPLICATION

PELLE CURTESOFT ES is a fatliquor that penetrates into the skin fibers and gives softness and lightness to the skins.

It can be used alone or in combination with any anionic fatliquors and water repellent agents.

PELLE CURTESOFT ES gives softness and natural appearance to the leather.

It is not stable against cations like chromium, aluminium, zirconium and potassium in the bath.

It is recommended to use alone or with other fatliquors between 2,0 % and 10,0 % according to the desired leather type.

STORAGE

In a cool and dry place in original packaging, can be stored for a period of one year. Product must be protected from excessive heat and cold.

PACKAGING

120 kg drums.
