

PELLE CURTECIN PU ADZ

CHARACTERISTIC

Water based polyurethane dispersion

Appearance : Yellowish semi-transparent liquid

Concentration (%) : 18,0±1,0

pH : 11,0±1,0

Charge : Anionic

PROPERTIES AND APPLICATION

- *PELLE CURTECIN PU ADZ* is a polyurethane-based adhesive resin with an excellent adhesion on every type of leather.
- This product is specifically designed for basecoats to promote adhesion on difficult leathers. It is normally applied after dilution with water (preferably not very hard) and glycole at the ratio of 150-200 gr/l. It can also be directly added in small proportions (30- 50 gr/l) to covering mixtures in order to increase their adhesion.
- Due to its aromatic nature, the product is not suggested for white or pastel shade finishings. It is generally compatible with all non-cationic finishing products.

STORAGE

In a cool and dry place in original packaging, can be stored for a period of one year. Product must be protected from excessive heat and cold.

PACKAGING

Bulk in 60-120 kg drums.

”TOUCH WITH PELLECURTEX”
